
CYBER SECURITY - INTERN

FICO (NYSE: FICO) is a leading analytics software company, helping businesses in 90+ countries make better decisions that drive higher levels of growth, profitability, and customer satisfaction.

Many of our products reach industry-wide adoption — such as the FICO® Score, the standard measure of consumer credit risk in the United States. FICO solutions leverage open-source standards and cloud computing to maximize flexibility, speed deployment and reduce costs. The company also helps millions of people manage their personal credit health.

Role, Responsibilities & Qualifications –

- Firm understanding of enterprise class application architectures that are highly scalable and reliable and the ability to secure them.
- Experience with multiple languages such as Java, C++, PHP, etc. and understand how to detect and remedy related security issues such as OWASP top 10 and OWASP Testing Guide.
- Ability to scale security within the SDLC by automation using tools sets such as source code analyzers, vulnerability scanners, configuration validation, and similar techniques.
