
SYSTEM MONITORING - INTERN

FICO (NYSE: FICO) is a leading analytics software company, helping businesses in 90+ countries make better decisions that drive higher levels of growth, profitability, and customer satisfaction.

Many of our products reach industry-wide adoption — such as the FICO® Score, the standard measure of consumer credit risk in the United States. FICO solutions leverage open-source standards and cloud computing to maximize flexibility, speed deployment and reduce costs. The company also helps millions of people manage their personal credit health.

Role, Responsibilities & Qualifications –

- As a Cloud Monitoring engineer, you will be responsible for building and enhancing FICO's cloud monitoring infrastructure.
- Responsible for creating and implementing system monitoring that will drive to improve the performance and reliability of the FICO cloud solutions
- Ensure the configuration and accuracy of monitoring for existing infrastructure (physical servers, virtual machines, network, and hardware)
- Working with members of the infrastructure and development teams to gather requirements and design solutions to meet monitoring needs of new and existing products and services
- Developing key business reports and metrics based on monitoring data
- Work with our automation teams to deliver monitoring as part of our standard builds
