CYBER SECURITY - INTERN

FICO (NYSE: FICO) is a leading analytics software company, helping businesses in 90+ countries make better decisions that drive higher levels of growth, profitability, and customer satisfaction.

Many of our products reach industry-wide adoption — such as the FICO® Score, the standard measure of consumer credit risk in the United States. FICO solutions leverage open-source standards and cloud computing to maximize flexibility, speed deployment and reduce costs. The company also helps millions of people manage their personal credit health.

Role, Responsibilities & Qualifications –

- Knowledge of Unix, Kubernetes/Docker, Terraform, AWS and Python.
- Knowledge of various operating systems and their implications.
- Convert feedback from security analysis tools into infrastructure improvements.
- Security testing at scale by building and implementing static and dynamic analysis tools, integrating security into CI/CD workflows for everyday deployments.
- Understanding of best practices regarding application security measures.
